

LEGEND:

Yellow Ellipses are files generated by the previous step/prerequisites for the next step. Indicated in Courier New is the directory where the files should be saved. The path is relative to idnas12.d.uzh.ch/Projects/Spinco/SINEEG/Stimuli/AudioGens/Experiment2

Blue Ellipses are plots generated by the previous step. Indicated in Courier New is the directory where the files should be saved. The exception to this is the webmaus-step, which provides the link to the page instead. In any filepath containing the word {NOISE}, this should be substituted with either NV or S1SSN or left out for non-degraded stimuli.

*** Note:** If a group of files needs to be moved or copied, use the scripts ./Scripts/utlis/files_move.py or ./Scripts/utlis/files_copy.py
